Legacy-Accounts Renewal Rate Schedule (v2) — Effective 12/10/2025

Effective: 12/10/2025 | Document Owner: VP, Paid Media | Version: v2.0

1. Scope

Effective 12/10/2025, the management fee for inherited-Bramwell account renewals is 13% of managed spend. This schedule applies exclusively to customer records carrying the ERPNext account_origin = "Inherited — Bramwell" designation at a renewal event, and only where the renewal effective date recorded against the underlying Sales Order (custom field: renewal_date) falls on or after 12/10/2025. This schedule is forward-looking from its effective date.

This schedule does not apply outside of a renewal event. Ongoing monthly billing for inherited-Bramwell accounts — including any billing that falls between renewal events — continues under Thornfield's standard rate card (12%) and is unaffected by this document. Accounts native to Thornfield are also outside the scope of this schedule.

2. Rates / Terms

Item	Rate / Term
Legacy-Accounts Renewal Management Fee	13% of managed spend at renewal, for inherited-Bramwell accounts renewing on or after 12/10/2025.
Applicability Window	Renewal effective dates from 12/10/2025 forward, until superseded.
Fee Basis	Qualifying managed platform spend billed for the renewal term.

3. Notes

The 13% legacy renewal rate is a narrower, renewal-only schedule and remains distinct from the company-wide 12% base management fee set out in the Thornfield Standard Rate Card. Ongoing monthly billing for inherited-Bramwell accounts continues under the standard 12% schedule; this document governs only the fee applied at a qualifying renewal event.

Rate lock-in is determined by the renewal effective date recorded against the underlying Sales Order in ERPNext (custom field: renewal_date).

Approved by: Ted Kowalczyk, VP Paid Media
